PROPOSAL

HIPAA-Compliant Document Signing System

Prepared for Shoreline Insurance Services

Prepared for: Steve Cudgma, Insurance Specialist

Prepared by: Chris Hauman, Webbersaurus Digital Agency

Date: August 19, 2026

Location: Branford, Connecticut

Why Now

Two dates this fall change how Scope of Appointment forms work, and they land back to back. Together they turn a paper SOA process from a mild inconvenience into a direct constraint on how fast you can enroll someone.

October 1, 2026: the 48-hour waiting period goes away

Rule Change

CMS has finalized the elimination of the fixed 48-hour waiting period between a completed Scope of Appointment and the personal marketing appointment. Beginning October 1 you can collect the SOA and hold the appointment the same day, provided the form is complete before any plan-specific discussion starts. The SOA itself is still required. What disappears is the mandatory wait.

October 15, 2026: Annual Enrollment Period opens

Peak Season

AEP runs October 15 through December 7, your highest-volume stretch of the year. The rule change arrives exactly two weeks before it starts.

Why the combination matters

Right now a mailed or faxed SOA costs you very little, because you were required to wait 48 hours regardless. The paperwork delay hides inside the regulatory delay. On October 1 the regulatory delay disappears and the paperwork delay becomes the only thing left standing between a ready prospect and a signed enrollment.

An agent who can put a signed SOA on a client's phone in two minutes can keep the conversation going and close it the same day. An agent still mailing forms is asking a motivated prospect to wait several days and then remember to come back. During AEP, when that prospect is also being called by every competitor in the state, that gap is where business goes.

The build takes 14 days. Starting now puts you live in early September, giving you a full month to get comfortable with the workflow before the rule change and AEP arrive together.

The Solution

A HIPAA-compliant digital signing system built on Jotform Sign, with a signed Business Associate Agreement in place before any client information moves through it. Your clients fill out and sign from any device, no account and no printer required.

Platform Cost / Month

How It Works

- 1

You Select a Template

Choose from your pre-built templates: Scope of Appointment, Medicare Client Worksheet, policy acknowledgments, and any others we set up together.
- 2

Enter Client Details and Send

Add the client's email or mobile number and any fields you already know. The system sends a secure, Shoreline-branded link.
- 3

Client Fills and Signs

They tap the link, complete the required fields, and sign on their phone or computer. No account to create, no app to install, no printer.
- 4

Completed and Secured

The signed document is encrypted and stored automatically. Both parties get copies, and a tamper-evident audit trail and certificate of completion are generated.

What the Platform Handles

✓ Encryption in Transit (TLS)	✓ Encryption at Rest	✓ Tamper-Evident Audit Trail	✓ Legally Binding Signatures
✓ Signed BAA (Gold Plan)	✓ ESIGN Act and UETA Compliant	✓ Automatic Email Reminders	✓ Mobile-Friendly Signing

Why Jotform Sign

We evaluated every major e-signature platform against one hard requirement: will they sign a Business Associate Agreement for a two-person office at a price that makes sense? Most will not.

PLATFORM	BAA AVAILABLE ON	PRACTICAL COST FOR A 1-2 PERSON OFFICE
Jotform Sign	Gold plan, per account	\$99/mo billed annually
DocuSign	Enhanced plan, 50-user minimum	Roughly \$400/mo and up
Adobe Acrobat Sign	Enterprise, user minimums apply	Custom, sales-negotiated
Dropbox Sign	Enterprise only	Custom, no response to our inquiry
PandaDoc	Enterprise only	Custom, highest of the group
SignNow	Enterprise tier	Around \$30/user with a 5-user minimum

The deciding factor is that Jotform prices per account rather than per user. Everyone else gates HIPAA behind an enterprise contract with seat minimums built for hospital systems, not a two-person agency in Branford.

One thing to be clear about on price

\$99/mo is the floor, not an upgrade we selected. Jotform's Bronze and Silver tiers do not carry a BAA and cannot legally hold protected health information. Gold is the lowest tier where HIPAA features and a signed BAA are available, and there is no additional charge to enable them. If anyone quotes you a cheaper HIPAA-compliant plan on this platform, it is not HIPAA-compliant.

We have verified this pricing as of August 2026. The Gold plan includes up to 10,000 submissions per month and 100 forms, which is far beyond what your practice will use. You are paying for the compliance layer, not the volume.

Scope and Deliverables

Everything needed to start sending compliant documents to clients, delivered in two weeks.

DELIVERABLE	DETAILS
Account Setup and HIPAA Configuration	Jotform Sign Gold account provisioned, HIPAA features enabled, compliance settings and access controls configured
BAA Execution	Business Associate Agreement executed with Jotform before any client information enters the system. This is the step that makes everything else compliant.
Document Templates (up to 5)	Your most-used forms converted into fillable, signable templates with correct field placement, validation, and signing order
Retention and Storage Plan	Written plan for where completed documents live long term and how they are retained. Connecticut requires 7-year retention, and the Jotform BAA covers Jotform only. If signed documents are copied into other storage, that storage needs its own agreement. We map this out so there are no gaps.
Internal Policy Drafts	Draft retention, access control, and incident response policies prepared for your review. These are starting templates tailored to your workflow, intended for review with your compliance contact or counsel before adoption.
Email Branding	Signing emails carry the Shoreline Insurance logo, colors, and contact details so clients recognize them immediately and do not mistake them for phishing
Training Session	One hands-on session covering sending documents, managing templates, tracking status, downloading completed forms, and day-to-day handling practices

SECTION 05

Pricing and Timeline

A flat fee with no hourly billing and no surprises.

SETUP

HIPAA-Compliant Document Signing

~~\$1,200~~ **\$1,000** flat fee

GOOD CLIENT DISCOUNT APPLIED

- ✓ Jotform Sign Gold account setup and HIPAA configuration
- ✓ BAA execution with Jotform
- ✓ Up to 5 document templates built and tested
- ✓ Retention and storage plan, including Connecticut's 7-year requirement
- ✓ Draft internal policies for your review
- ✓ Email branding with the Shoreline Insurance identity
- ✓ One hands-on training session, in person or virtual
- ✓ End-to-end testing before you send anything to a real client

Ongoing platform cost: \$99/mo for Jotform Sign Gold, billed annually and paid directly by Shoreline Insurance. This is the lowest tier that carries a BAA. No ongoing fee from Webbersaurus.

Timeline

DAYS 1-3

Account and BAA

Provision the Gold account, execute the BAA, enable HIPAA settings, configure access. Nothing containing client information moves until the BAA is signed.

DAYS 4-7

Template Building

Convert your top five forms into fillable, signable templates with field validation, signing order, and sensible defaults.

DAYS 8-10

Branding, Retention, and Policies

Apply Shoreline branding to signing emails. Deliver the retention and storage plan plus draft internal policies.

DAYS 11-14

Training and Launch

Hands-on training, full end-to-end test, then go live and send your first real documents.

Starting in late August puts you live in early September. That leaves a comfortable month to build the habit before the October 1 rule change and the October 15 start of AEP.

Ready to Get Started?

Your appointment reminder system has been running since May without a hitch. This is the same approach applied to your paperwork: set it up properly once, then let it run through your busiest season. Let's grab fifteen minutes to go through your forms and get the account opened.
